

I am

A Worker/
Technician

I'm trying to

Work in a
Hazardous
Industrial Area

But

I know it not a secure
and safe environment
to work on

Because

the temperature,
humidity and air
quality might change
to unhospitable levels

Which makes me feel

that this can lead to
dangerous health
complications

I am

A Plant
Manager

I'm trying to

Supervise a group of workers
working in Hazardous
Industrial Area and ensure
saftey for the workers

But

who needs to be
informed of the possible
hazardous situation
which might our in prior

Because

it could pose threat to
the lifes and welfare of
the workers

Which makes me feel

that there could
be a loss of life
of workers
